## SUMMARY

I'm a self starter with proven track record in software engineering. I have strong communication and leadership skills and am highly effective at learning new technologies such as AWS, Node.js, React, TypeScript, MobX, Angular, Ruby on Rails, and serverless architecture. I develop full-stack applications coupling beautiful, intuitive UIs with well-designed, efficient back-end APIs.

## EXPERIENCE

**Software Engineer** Seattle, WA  
ScribeWare July 2017 to Current

- Architect and implement features for professional service reporting application built on Electron utilizing Node.js back-end and React front-end written in TypeScript
- Build API in AWS Lambda using Serverless and Node.js for payment processing (Stripe), file uploads (S3), database operations (DynamoDB/CouchDB), and secure contract delivery and signing
- Provide exceptional customer service through both direct interaction with customers and technical debugging

**Software Engineer** Seattle, WA  
The Giving Group May 2017 to Current

- Develop front-end Angular UI for organization that enables nonprofit donations for donations groups and giving circles
- Build REST API (TypeScript/Node/Stripe/AWS Lambda/API Gateway) for both internal use and integrating other organizations with our application
- Design and deploy automated nonprofit submission and payment processing portal

**Project Manager/Web Developer** Seattle, WA  
Cancer Research Connect Jan. 2016 to May 2017

- Built clinical trial search engine through self-teaching of Ruby on Rails, JavaScript, and related technologies
- Developed data-scraping algorithm utilizing federal government API to optimize process of collecting clinical studies, filtering to those relevant to project, and standardizing data
- Prepared complete project plan and managed design of all key marketing elements such as brand name, logo, and website
- Led development team in creating application that empowers people with cancer to access clinical trials through a searchable database using React front-end and Rails API

**Sales & Marketing Consultant** Seattle, WA  
Schall Consulting Group Sept. 2013 to Dec. 2015

- Designed promotional forecasting model for \$10M+ private label brand to optimize inventory management and enhance promotional activity
- Managed reformulation and package design process for high-volume, low-growth product line that resulted in 10%+ year-over-year sales growth
- Developed sales and marketing strategy and managed logo/package design projects for dozens of natural and organic food companies

## EDUCATION

**Boston College**  
BA Economics/Psychology 2009

**Dev Bootcamp**  
Software Development 2017

## SKILLS

**Software Development:** React, Node.js, JavaScript, TypeScript, Electron, AWS, Serverless Computing, MobX, Databases (SQL/NoSQL), Ruby, Rails, Angular
